

Jungle Honey Company BioActive Eucalyptus Honey

After many years of testing and experimentation, Jungle Honey Company have been able to hone a process that results in the targeting three species of native Australian eucalyptus flora.

The three specific species of Eucalyptus targeted generate honey of the highest quality containing the highest level of medicinal properties.

The Jungle Honey Company Australia produces the highest quality 100% pure raw medical grade BioActive Eucalyptus honey from our beehives right here in Australia. With Total Activity ratings of TA30+ and TA35+ our honey products offer superior health benefits to more traditional honeys like Manuka and Melaleuca.

Jungle Honey Company offer our 100% pure raw Eucalyptus BioActive Medicinal Honey in three all natural varieties

Jarrah Honey is a dark, thick, tasty and aromatic honey with somewhat of a caramel aftertaste.

Red Gum Honey has a beautifully clear, thick and rich golden colour with a smooth, mild honey flavour.

Blackbutt Honey is a dark coloured honey with a strong full-bodied flavour similar to our Jarrah honey.

Achieving BioActive Honey

BioActive Honey with a Total Activity TA30+ is considered to be Very High - Medical Grade honey. BioActive honey with a TA 35+ is considered to be Super Strength - Medical Grade honey. Jungle Honey Company Eucalyptus BioActive Medicinal Honey contains only medicinal grade honey being harvested honey with a TA greater than 30+.

Total activity (TA) is a measure of the antimicrobial potency (bacterial + fungal). It is determined by the level of hydrogen peroxide and non-peroxide antimicrobial activity present in the honey.

Some Active Uses of Medicinal Honey

- Skincare
- Wounds / Facials / Acne
- Aide Respiratory Ailments
- Slow or Support Aging
- Improve Blood Health
- Aide Digestive Health
- Oral Health
- Improve Sleep
- Energy Booster

What is Total Activity (TA)?

Total Activity is the measurement of the honey's anti-microbial quality, it's anti-microbial strength in killing bacteria. Total Activity (TA) = Peroxide Activity + Non-Peroxide Activity.

This jar of honey, with TA 30+ has very powerful beneficial antimicrobial and antibacterial properties. Considered as High Medical Grade Honey. The table on right shows TA30+ ratings is superior to any MGO equivalent ratings for Manuka Honey

TA (Total Activity)	UMF (Unique Manuka)	MGO (Methylglyoxal)
35+	*	*
30+	*	*
20+	20+	829
15+	15+	550
10+	10+	263
5+	5+	100

Every batch of Jungle Honey Company's BioActive honey is Australian Government Laboratory Certified and vigorously tested to ensure the highest degree of export quality assurance.
